divyakanth.tirumalasetty@gmail.com

System Engineer with **nearly 5 years of experience** at TCS across **L2 production support, Java development and test support** for banking, insurance and retail clients. Skilled in incident management, root cause analysis, **end-to-end and regression testing**, monitoring tools and Control-M batch operations.

SKILLS

Industry Skills

- IT Infrastructure Management
- Production Support Engineering
- Root Cause Analysis and Troubleshooting
- Batch Job Scheduling and Monitoring (Control-M)
- End-to-End, Functional and Regression Testing
- Banking, Insurance and Retail Domain

Technical Skills

- **Monitoring Tools:** ServiceNow, Control-M, Kibana, Splunk, Grafana, Datadog, OpenShift
- **Testing:** Sauce Labs, Mainframe Transaction Validation, Conversant Integrations
- **Languages:** Core Java, Python, HTML, CSS, Hadoop
- **Reporting:** Power BI
- **Database:** MySQL
- **Practices:** Agile, SRE (Site Reliability Engineering), ITIL
- **OS and Servers:** Linux, Windows, Tomcat, WebLogic
- **AI Tools:** ChatGPT, Copilot

Professional Skills

- Analytical Thinking and Problem-Solving
- Team Collaboration and Knowledge Sharing
- Effective Communication

DIVYAKANTH TIRUMALASETTY

System Engineer

EXPERIENCE

Tata Consultancy Services, Hyderabad 04/2026 - Present

System Engineer - Property and Claims Test Support (USAA)

- Perform end-to-end flow testing and validation for Property and Claims applications supporting USAA business processes.
- Validate workflows across legacy and modern applications, ensuring successful transaction processing across integrated systems.
- Analyze Kibana logs and Mainframe transactions to trace application flows, validate backend processing and troubleshoot failed scenarios.
- Use Sauce Labs for cross-browser and UI validation, and execute functional and regression testing across supported application flows.
- Validate integrations involving Conversant and other downstream and upstream systems, identifying transaction failures and data inconsistencies.
- Collaborate with development and support teams to investigate defects, perform RCA, retesting and regression validation, and ensure issues are resolved within agreed SLAs.

Tata Consultancy Services, Chennai 11/2022 - 04/2026

System Engineer - L2 Production Support, Core Banking (USAA)

- Provided L2 production support for a Java-based core banking application (client: USAA, San Antonio, US) in a high-availability environment.
- Monitored application health and managed incident response and resolution using Kibana, Splunk, Grafana, Datadog and OpenShift.
- Troubleshot and resolved application server issues (Tomcat, WebLogic) before they escalated into customer-facing impact.
- Drove the incident lifecycle and participated in major incident calls to restore services within SLA timelines.
- Performed log analysis and root cause identification, and implemented corrective actions to keep systems stable.
- Monitored and scheduled business-critical batch jobs through Control-M for uninterrupted operations.
- Worked with cross-functional teams on problem management, change requests and deployment validations in line with ITIL.
- Tuned MySQL database performance, ran ad hoc diagnostic queries and coordinated with DBAs to resolve recurring issues.
- Maintained deep knowledge of application architecture and business workflows, and followed support and escalation procedures.

EDUCATION

Bachelor of Technology in Civil Engineering - *Jawaharlal Nehru Technological University, Kakinada*

CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals (AI-900)

ACHIEVEMENTS

- Received the **On-the-Spot Award 4 times** and the **Star of the Team Award** for outstanding performance.
- Recognized as **Xcelerate Warrior** at TCS.

Tata Consultancy Services, Hyderabad 11/2021 - 11/2022

Assistant System Engineer - Java Developer, Macy's Merchant Tools (Retail)

- Worked as a Java developer and Front-end Developer Trainee on Macy's Merchant Tools, a retail application for the Macy's online platform, supporting senior developers.
- Updated code for Jira stories based on client requirements.
- Built and enhanced user interface pages to improve usability and design.

PROJECT DETAILS

- **USAA - Property and Claims (Insurance):** Test Support Engineer for end-to-end flow testing and validation across legacy and modern applications.
- **USAA - Core Banking (Banking):** Production Support Engineer for a core banking application serving banking, financial services and insurance customers.
- **Macy's Merchant Tools (Retail):** Front-end Developer Trainee creating and enhancing UI pages for the Macy's online platform.

KEY HIGHLIGHTS

- Nearly 5 years at TCS in L2 production support, Java development and test support for USAA (banking, insurance) and Macy's (retail).
- Experienced in end-to-end, functional and regression testing across legacy and modern applications, including Mainframe transactions.
- Skilled in Splunk, Kibana, Grafana, Datadog, OpenShift, ServiceNow, Control-M and Sauce Labs.
- Microsoft-certified in Azure AI Fundamentals (AI-900); hands-on with AI tools such as ChatGPT and Copilot.
